Apr – Aug 2017

- Interfaced with the professor and 60 students to deliver a C programming course.
- Provided programming consultations in English, Japanese and Chinese during non-class hours.

Nagase Bros Inc. – *Web Designer*

Feb – Apr 2016

- Worked with Adobe Fireworks and Dreamweaver to design websites for advertising.
- Maintained the information websites of different cram schools using HTML and CSS.

SKILLS

- IT: Java, Python, C (Prior experience), JavaScript, HTML5, CSS3, MongoDB (Prior experience)
- Language: Mandarin (Native), English (TOEFL: 112/120), Japanese (Upper Intermediate)

PROJECTS *(more at github.com/OscarWang114)*

WaseTime • www.wasetime.com

Dec 2017 – Present

Source Code: github.com/wasetime/wasetime-web

- Created an unofficial web app for syllabus searching, classroom usage reporting, and bus schedule checking at Waseda University.
- Implemented instant searching and cached the syllabus content in the redux state tree, eliminating unnecessary reloads in a single session.
- **Tools:** Create React App, React, Redux, MongoDB, Express.js, Node.js, Travis CI

Waseda Syllabus Scraper • github.com/wasetime/waseda-syllabus-scraper

Oct 2017 – Present

Created to provide syllabus, classroom, and building information for WaseTime

- Created a web scraper for collecting course information from the syllabus database at Waseda University.
- Used MongoDB aggregation framework to extract classroom usage information into multiple collections, reducing classroom search time by more than 90%.
- **Tools:** Python, JavaScript, MongoDB

LISA: Levels Integrated Secretarial Agent • github.com/CS2103AUG2017-T13-B1/main

Aug – Dec 2017

Five-man team project in Software Engineering course

- Created a 14K LoC desktop managerial application for life insurance agents.
- Designed an original model expressing one-to-many relationships between a person and life insurances using UUID and JavaFX data structures.
- **Tools:** Java, JUnit, Gradle, Travis CI

Simple Chat App • github.com/OscarWang114/SimpleChatApp

Apr – May 2017

Created an online chat room integrated with Google Maps

- Used Google Maps API to display chat messages on an info window positioned at the user's current geolocation.
- **Tools:** Bootstrap, jQuery, Node.js, Express.js, Socket.IO, Google Maps API
